

NORSAP 4000 IMPULSE

The NorSap 4000 IMPULSE is a large module based platform offering endless combinations and options. The new electric plug and play system ensures safe, easy-to-use maintenance. The chair design allows full integration of client components and equipment and ensures long-term operation.

NORSAP 4000 IMPULSE M

8940 Medium (M) tillable armrest.
Footrest and fixed XL column height 70

NORSAP 4000 IMPULSE L

8950 Large (L) armrests.
XL Height adjustable XL column 60/87

The series fully complies with the strict ergonomic requirements found in the NORSOK regulations. Our chairs are designed to comfortably fit 90 % of all users according to the ISO7250 Standard.

QUICKSIZE:

On the NorSap 4000 Impulse, every part of the arm and leg can be significantly sized up and down, allowing true accommodation for 90% of users. In order to keep it simple, we made the NorSap Quicksize function, enabling all six electric motors to simultaneously adjust arms and legs parameters based on your height, making it a breeze to RESET and RESIZE the operator's chair after the previous shift. NorSap Quicksize may also be used for complimentary adjustments to arms and leg, speeding up the process when taking over the chair after a shift.

NORSAP PERSONAL MEMORY (option)

As an add-on to NorSap Quicksize, the chair may be fitted with a NorSap Personal Memory panel that allows up to four unique save slots for any combination of chair adjustments. Use this for teams where one or several of the users is given a personal saving slot for their body size. The NorSap Personal Memory panel recalls any previously saved chair size with one button press.

If nothing else is specified, the chair will be delivered in black leather upholstery. All sitting heights measured without load - a variation of 2-5 cm. The undercarriage of the seat allows height adjustment.
