

NORSAP 1600

STANDARD

Photo by Lynx Yachts - YXT 24 EVO

PRODUCT INFORMATION

The **Norsap 1600** range is robust and comfortable, ideally for demanding marine environments. The spacious M-armrests offer room for internal cabling and installation of equipment and accessories, user-friendly buttons for height and backrest adjustments, conveniently located on the armrest. Standard adjustments are rotation, gas-dampened height adjustment, flip-up adjustable armrests and fold-up footrest. The chair is mounted to a 150 mm x 200 mm oval column or a 150 mm diameter column, creating a firm base for the footrest and seat. The flanged base has a large footprint with four to six mounting holes for secure fastening to the deck. The flanged base is designed for permanent deck mounting but can also integrate with an optional deck rail solution.
